

iMAXEAM™

Essential Add-On Products for Maximo® Users

MAXLS™

Data Management Tool for Maximo®

iMaxeam, with operations worldwide, developed MAXLS Data Management Add-on exclusively for IBM® Maximo® users. Considered the premier data management tool for end-users, MAXLS is a fully integrated and embedded

spreadsheet UI that makes data entering, editing, and loading easier and quicker than any other product in the marketplace. No need for custom software, pricey scripts, or buying features that are never used! With MAXLS, your entire organization can enjoy faster, easier, and better work management.

- IBM® Gold Business Partner™
- Certified for IBM® Cloud & Smarter Infrastructure
- MAXLS is **technically verified** by IBM®
- Exclusive to IBM® Maximo®
- Out-of-the-box, embedded & integrated add-on
- Installed and configured to your needs

- Embedded spreadsheet UI in any application
- Enables use of Microsoft Excel with Maximo®
- Directly edit multiple fields in just one tab
- Maintains security and business rules

Non-technical – Familiar Interface - Unparalleled Support – Best-in-Class

Difference:

Frankly, the competition doesn't come close to matching MAXLS. While there are other products that perform data exporting/importing, they all remain too technical for end-users, and too restrictive for all users. MAXLS has a **very user-friendly** spreadsheet interface that is **highly configurable** to your business and security needs versus other's restrictive and technical interfaces. And no one offers the type of technical and user **support** that iMaxeam provides clients.

Many clients have tried native import/export or third-party tools; yet in the end go with MAXLS.
